Developing  
**Responsible Tourism**  
together with the  
Congolese communities

# Adventures of Mayombe

Adventures of Mayombe is created out of concern about the destruction of the forests in Central Africa, and the incredible animals that live here. To contribute to the conservation of the forests, we want to establish responsible tourism projects in the Republic of Congo in cooperation with the local communities. We believe that only by improving human livelihoods the forests will remain and biodiversity conserved.

## Our vision:

the protection of the forests in Central Africa by empowering the people who live there.

## Our mission:

Adventures of Mayombe wants to contribute to the conservation of the rich nature of Central Africa. We introduce the concept of responsible tourism to the Congolese people by providing information, develop tourism products and projects together with local communities, and introduce the nature and culture of Congo to travelers. Conservation, education and empowerment of the Congolese people are the principles of our policy.

We believe that tourism can be a powerful tool for both conservation and improvement of the living conditions of the local communities. Our activities will have a minimal impact on nature, and the privacy and culture of the local communities.

## Mayombe Tourism Centre

The heart of Adventures of Mayombe will be the Mayombe Tourism Centre, a Tourism Development and Activities Centre in the city of Pointe-Noire. The Mayombe Tourism Centre will be a vibrant centre for Congolese inhabitants as well as tourists in the framework of responsible tourism. We want to play an active role in the communication about nature conservation, and the development of responsible tourism activities in Congo.

## Tourism development

In our tourism development we distinguish tourism products and tourism projects. We develop both products and projects in cooperation with Congolese people and local NGO's.

## Tourism activities

In our tourism activities we distinguish three products: tourist information, products & workshops, and excursions.
